Pod coffee maker is a new kind of coffee machine. Pod coffee machine manufacturers put the coffee in a sealed aluminum or plastic Pod in advance, then filling it with nitrogen to ensure freshness, so the users can finish the brewing process simply by put the Pod in the Pod coffee machine. Compared with the ordinary coffee machine, this operation is more simply, the volume is lighter, and its costs are cheaper.

Pod coffee makers balance the convenience of instant coffee with the quality and flavour of freshly brewed drinks. They make single-serve coffees from ground beans that are sealed inside pods or capsules, which work in a similar way to packed coffee grounds in an espresso machine.

More powerful than any brand is the underlying driver of this demand. Fresh-packed pod coffee machines are the best system yet invented for consumers to enjoy their daily dose of coffee in the comfort of their homes. The machines standardize the delivery of high-quality roasts, making coffee not only convenient to make but better tasting.

There is a shift from multi-serve to single-serve formats, both at and away from home. Brew-by-pack format innovations are also driving value growth in mature markets as consumers are paying more per cup.

Proliferating out-of-home offerings are driving coffee demand, as consumers are willing to pay more for convenience. Gourmet coffee shops continue to lose ground in specialty coffee to quick-service restaurants as they develop premium beverage programs.

Growth in global coffee demand is focused on differentiation, quality and premiumization within roast and ground coffee. Growing consumer favor accorded to

premium offerings is demonstrated by the value placed on fair trade, health benefits, organic and local details on coffee origins.

Consumer preference for convenience and quality are driving innovation in single-serve roast and ground brewing technology, which in turn is helping drive growth in the single-serve coffee market.
