## Abstracts

According to our (Global Info Research) latest study, the global Polarized Release Film for Display Panel market size was valued at US\$ 554 million in 2024 and is forecast to a readjusted size of USD 742 million by 2031 with a CAGR of 4.2% during review period.

Polarizers are key components of liquid crystal panels, and release films are one of the constituent structures of polarizers. At present, LCD display and OLED display are still mainstream display technologies, occupying dominant positions in the medium to large-sized and small-sized fields respectively. The LCD module includes a backlight module and a liquid crystal panel, and the structure includes multiple optical films. In its common structure, the backlight module is usually composed of '1 reflective film+2 brightening films+2 diffusion films', while the liquid crystal panel includes 2 polarizing films; OLED does not have a backlight module and requires one polarizing film, and using polarizing film technology for OLED is more difficult and has higher added value. Polarizing film, also known as polarizing film, is mainly used to polarize natural light that does not have polarization, transforming it into polarized light. Combined with the twisting properties of liquid crystal molecules, it controls the passage of light, thereby improving transmittance and viewing angle range, and forming anti glare functions. Polarizing film, as one of the key components of liquid crystal panels, is used for imaging in liquid crystal displays. The liquid crystal is composed of two polarizing films tightly attached to the liquid crystal glass, forming a total thickness of about 1mm; The basic structure of polarizing film includes: PVA (polyvinyl alcohol) in the middle, two layers of TAC (cellulose triacetate), PSA film (pressure-sensitive adhesive), Release film (release film), and Protective film (protective film). Among them, TAC film and PVA film are the main film layers, accounting for about 62% of the total cost, and release film and protective film account for about 15% of the total cost.
