According to our (Global Info Research) latest study, the global PTA for Industrial Use market size was valued at US\$ 71910 million in 2024 and is forecast to a readjusted size of USD 81010 million by 2031 with a CAGR of 2.1% during review period.

Terephthalic Acid is divided into crude terephthalic acid and purified terephthalic acid. Purified terephthalic acid can be obtained after reprocessing crude terephthalic acid. Purified terephthalic acid for industrial use is the mainstream product on the market, so this report only studies purified terephthalic acid.

The main production areas of PTA market are concentrated in Asia, including China, India, Southeast Asia, South Korea, Japan, etc. The production share in North America and Europe is relatively low, and the production enterprises are relatively concentrated. In North America, Alpek Polyester, Ineos and Indorama Ventures are the main production enterprises. In Europe, Ineos, Indorama Ventures and Orlen Group are the main production enterprises. In recent years, due to cost reasons, Japanese PTA enterprises have continuously launched local PTA production. At present, only Toray still has a PTA factory in Japan. South Korean local companies such as Lotte are also withdrawing from the PTA market, but there are still several local production enterprises.

There are still about 20 large and small production enterprises in the Chinese market, and the overall market size is still expanding. Among them, the top 8 enterprises account for about 3/4 of China's PTA production capacity.

The production capacity of production enterprises in the Indian market is relatively stable, and the production scale of Southeast Asian enterprises has a tendency to expand.
