According to our (Global Info Research) latest study, the global Radio Pet Tracking System market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

A pet tracking system comprises a pet positioning device and a pet monitoring device. The pet positioning device is worn on the pet and includes a positioning unit to detect the position of the pet. The pet positioning device also establishes direct wireless communication with the pet monitoring device with a wireless communication unit to return the pet's position. Therefore, the pet monitoring device can master the pet's location without the mobile communication provided by the telecommunications industry. Preferably, when the pet is out of a predetermined range, the pet monitoring device can also give a warning.

According to Our PET Supplies Research Center, the global pet industry reached \$ 261 billion in 2022, a year-on-year increase of 11.3%. The United States gains the highest pet penetration rate and becomes the largest pet market. According to the American Pet Products Association (APPA), 66% of American households keep pets, and the total industry sales was about US\$136.8 billion, an increase of 10.8% over 2021. According to IVH, the German pet products industry association, the number of pets in Germany reached 33.4 million in 2022, with a total turnover of nearly €6.5 billion. The 2023 China Pet Industry Trend Insight White Paper released by JD shows that the market size of the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 376%.
