Abstracts

According to our (Global Info Research) latest study, the global Recloser Control market size was valued at US\$ 1689 million in 2024 and is forecast to a readjusted size of USD 2319 million by 2031 with a CAGR of 4.7% during review period.

There are two basic types of recloser control schemes: an integral hydraulic control or an electronic control located in a separate cabinet. Hydraulic recloser control is used in most single-phase reclosers and in three-phase recloser types 6H and V6H and is built as an integral part of the recloser. Electronic recloser controls are used in most three-phase reclosers and in the single-phase recloser types VXE, NOVA STS, and NOVA?. Compared with the hydraulic control, electronic controls are more flexible, more easily customized and programmed, and many have advanced protection, metering, and automation functionality.

The two main types of Recloser Control are Hydraulic Control and Electronic Control, which accounted for about 56% and 44% of market share in 2019, respectively. Europe had the largest market share in 2019 which accounted for over 28%, while United States and China held a market share of about 20% and 19%, by which these two regions take important roles that cannot be ignored. Some of key players in the global recloser control market are worldwide well-known companies, such as Eaton, Schneider Electric, ABB, GE and Siemens etc. In 2019, the top 5 manufactures of recloser control occupied almost 60% of market share in total.
