According to our (Global Info Research) latest study, the global RoboVac market size was valued at US\$ 69410 million in 2024 and is forecast to a readjusted size of USD 181030 million by 2031 with a CAGR of 14.8% during review period.

RoboVac or a roomba, is an autonomous robotic vacuum cleaner which has a limited vacuum floor cleaning system combined with sensors and robotic drives with programmable controllers and cleaning routines.

Robot vacuums are impressive devices that will clean your floors well without complaining (much). As prices have dropped, these busy little bots have become less of a luxury and more of a necessity. They can reach places most standup vacs never see (under beds and sofas) and, thanks to better batteries and robot brains, rarely get tired of cleaning.
