Room temperature storage solder paste is an advanced soldering material designed to be stored and used without refrigeration, eliminating the need for cold chain logistics. This type of solder paste maintains its viscosity, stability, and performance at ambient temperatures, typically within a range of 20–30°C. Its innovative formulation reduces handling complexity and storage costs while ensuring excellent printability, consistent reflow performance, and reliable solder joints. Ideal for industries such as electronics manufacturing, this solder paste offers increased convenience, especially in regions or facilities where refrigeration access is limited, without compromising on quality or reliability in soldering applications.
