Abstracts

According to our (Global Info Research) latest study, the global Semiconductor Used High Purity Metal Sputtering Target Material market size was valued at US$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The global market for semiconductor was estimated at US$ 579 billion in the year 2022, is projected to US$ 790 billion by 2029, growing at a CAGR of 6% during the forecast period. Although some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.76%, Sensor with 16.31%, and Logic with 14.46% growth, Memory declined with 12.64% year over year. The microprocessor (MPU) and microcontroller (MCU) segments will experience stagnant growth due to weak shipments and investment in notebooks, computers, and standard desktops. In the current market scenario, the growing popularity of IoT-based electronics is stimulating the need for powerful processors and controllers. Hybrid MPUs and MCUs provide real-time embedded processing and control for the topmost IoT-based applications, resulting in significant market growth. The Analog IC segment is expected to grow gradually, while demand from the networking and communications industries is limited. Few of the emerging trends in the growing demand for Analog integrated circuits include signal conversion, automotive-specific Analog applications, and power management. They drive the growing demand for discrete power devices.

This report is a detailed and comprehensive analysis for global Semiconductor Used High Purity Metal Sputtering Target Material market. Both quantitative and qualitative

+357 96 030922
info@marketpublishers.com

analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Semiconductor Used High Purity Metal Sputtering Target Material market size and forecasts, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/Ton), 2020-2031

Global Semiconductor Used High Purity Metal Sputtering Target Material market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/Ton), 2020-2031

Global Semiconductor Used High Purity Metal Sputtering Target Material market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/Ton), 2020-2031

Global Semiconductor Used High Purity Metal Sputtering Target Material market shares of main players, shipments in revenue ($ Million), sales quantity (Tons), and ASP (US$/Ton), 2020-2025

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries
To assess the growth potential for Semiconductor Used High Purity Metal Sputtering Target Material
To forecast future growth in each product and end-use market
To forecast future factors affecting the marketplace

This report profiles key players in the global Semiconductor Used High Purity Metal Sputtering Target Material market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include JX Nippon Mining & Metals, Materion, Konfoong Materials, Linde, Plansee SE, Honeywell, TOSOH, TANAKA, ULVAC, Luvata, etc.

info@marketpublishers.com

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Semiconductor Used High Purity Metal Sputtering Target Material market is split by Type and by Application. For the period 2020-2031, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

- Aluminum Target
- Titanium Target
- Tantalum Target
- Copper Target
- Others

Market segment by Application

- Consumer Electronics
- Vehicle Electronics
- Communication Electronics
- Others

Major players covered

- JX Nippon Mining & Metals

+357 96 030922
info@marketpublishers.com

Materion

Konfoong Materials

Linde

Plansee SE

Honeywell

TOSOH

TANAKA

ULVAC

Luvata

Hitachi Metals

Sumitomo Chemical

Longhua Technology Group (Luoyang)

GRIKIN Advanced Material

Umicore

Angstrom Sciences

Advantec

Changzhou Sujing Electronic Material

Market segment by region, regional analysis covers
North America (United States, Canada, and Mexico)
Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

+357 96 030922
info@marketpublishers.com

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)
South America (Brazil, Argentina, Colombia, and Rest of South America)
Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

The content of the study subjects, includes a total of 15 chapters:

Chapter 1, to describe Semiconductor Used High Purity Metal Sputtering Target Material product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Semiconductor Used High Purity Metal Sputtering Target Material, with price, sales quantity, revenue, and global market share of Semiconductor Used High Purity Metal Sputtering Target Material from 2020 to 2025.

Chapter 3, the Semiconductor Used High Purity Metal Sputtering Target Material competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Semiconductor Used High Purity Metal Sputtering Target Material breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2020 to 2031.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2020 to 2031.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2020 to 2025.and Semiconductor Used High Purity Metal Sputtering Target Material market forecast, by regions, by Type, and by Application, with sales and revenue, from 2026 to 2031.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Semiconductor Used High Purity Metal Sputtering Target Material.

Chapter 14 and 15, to describe Semiconductor Used High Purity Metal Sputtering Target Material sales channel, distributors, customers, research findings and
