Shaving Soap is a special soap for shaving. It is a specially formulated bar of soap designed to provide a rich lather, lubrication and protection for shaving.

Shaving soap formulations often include high-quality detergents, moisturizers, and other natural ingredients. These ingredients create a rich lather that lubricates and protects while shaving, reducing skin irritation and discomfort. Using shaving soap requires the help of a brush and water to create a lather. The shaving brush agitates the shaving soap and water to create a fine, rich lather. This foam allows the blades to glide over the skin more easily, reducing friction and discomfort while shaving. Shaving soap is usually sold in rounds or squares and can be purchased on its own or as part of a shaving kit. They are suitable for use with conventional safety razors or razor blades.
