A small engine is the general term for a wide range of small-displacement, low-powered internal combustion engines used to power lawn mowers, generators, concrete mixers and many other machines that require independent power sources. Most small engines are single-cylinder, with a few V-twin units. Although much less common, there have been small Wankel (rotary) engines manufactured for use on lawn mowers and other such equipment.

Global 5 largest manufacturers of Small Engine are Honda Engines, Yanmar, Kohler Power, Briggs & Stratton and Kawasaki, which make up about 65%. Among them, Honda Engines is the leader with about 20% market share.

North America is the largest market, with a share about 32%, followed by Asia Pacific and Europe, with the share about 31% and 28%. In terms of product type, Diesel Engines occupy the largest share of the total market, about 80%. And in terms of application, the largest application is Construction Equipment, followed by Gardening Equipment.
