According to our (Global Info Research) latest study, the global SMD Reed Switch market size was valued at US\$ 168 million in 2024 and is forecast to a readjusted size of USD 220 million by 2031 with a CAGR of 4.0% during review period.

SMD Reed Switches are the cost-effective solution for automated PCB assembly, available in tape & reel packaging.

A Surface Mount Reed Switch (SMD Reed Switch) is a reed switch manufactured using surface mount technology for small, compact applications in electronic equipment. It can be easily soldered on the circuit board together with other surface mount components to realize the control and switching of the circuit. Surface mount reed switches usually have a small and compact design, which is suitable for the tight space layout of electronic equipment. The switch is manufactured using surface mount technology, which can be pasted on the surface of the circuit board by equipment such as a hot air stove, thereby achieving efficient production and assembly. Surface mount reed switches are widely used in mobile phones, tablet computers, smart watches, automotive electronics, medical equipment, consumer electronics and other fields to realize the control, switching and detection functions of circuits.
