Stainless steel cold-drawn square bars are precision-engineered metal bars with a square cross-section, manufactured through a cold drawing process. This method involves pulling the steel through a die without applying heat, resulting in enhanced dimensional accuracy, smoother surface finishes, and increased tensile strength compared to hot-rolled alternatives. These square bars are highly valued for their durability, corrosion resistance, and aesthetic appeal, making them suitable for applications in industries such as construction, automotive, aerospace, and machinery. Common uses include manufacturing fasteners, fittings, tools, and decorative components where tight tolerances and superior surface quality are essential. They are available in various grades, including 304 and 316 stainless steel, to meet diverse performance requirements.
