## Abstracts

According to our (Global Info Research) latest study, the global Stainless Steel Double Eccentric Butterfly Valve market size was valued at US\$ 242 million in 2024 and is forecast to a readjusted size of USD 295 million by 2031 with a CAGR of 2.9% during review period.

Stainless steel double eccentric butterfly valve is a structurally optimized butterfly valve that has been improved on the basis of traditional eccentric butterfly valves, adopting a double eccentric design to enhance sealing, durability, and flow regulation accuracy. The main advantage of the double eccentric design is that it reduces the friction between the butterfly plate and the valve seat, making the operation of the valve smoother, extending its service life, and improving its sealing performance, especially suitable for situations that require high sealing and flow regulation.
