Stainless steel kidney-shaped trays are a common medical device, named for their shape similar to human kidneys, and are mainly used in various operations in hospitals, clinics, and nursing institutions. Its main functions include collecting and storing medical waste, holding disinfectants and cleaning fluids, temporarily storing medical equipment, and providing convenience in nursing operations. Since it is made of stainless steel, it has excellent corrosion resistance, high strength, and easy cleaning. The stainless steel kidney-shaped tray can withstand the erosion of various disinfection and cleaning fluids, and will not rust or deform after long-term use. In addition, the stainless steel surface is smooth, easy to clean and disinfect, effectively preventing bacterial growth, and meeting medical and health requirements. Stainless steel kidney-shaped trays of different sizes can meet different medical needs, making them an essential tool in medical operations.
