According to our (Global Info Research) latest study, the global Temperature Controlled Safety Shower market size was valued at US\$ 979 million in 2024 and is forecast to a readjusted size of USD 1310 million by 2031 with a CAGR of 4.2% during review period.

A temperature-controlled safety shower is a shower system that uses temperature control technology to automatically adjust the ratio of hot and cold water through a temperature sensing system and a control valve to keep the outlet water temperature within a preset range. It can prevent the water temperature from fluctuating between hot and cold, and avoid scalding or discomfort to users, thereby improving the safety and comfort of showering. At the same time, temperature-controlled safety showers usually have the advantages of energy saving and environmental protection.
