Tool Steel refers to a variety of carbon and alloy steels that are particularly well-suited to be made into tools. Tool steels are notable for their hardness, resistance to abrasion and deformation. Today, tool steel is widely used in various specific tool applications like dies, cutting, mold-making and hammers (personal or industrial). Tool Steel can retain a cutting edge at very high temperatures which is why they are often used in the shaping of other materials through cutting, pressing, coining or extruding. Their resistance to abrasion lends to their use in the production of injection molds.

The global key manufacturers of Tool Steel & Die Steel include Voestalpine, Swiss Steel Group and Tiangong International, etc, top 3 manufacturers hold a share approximately 27%. Voestalpine is the world's largest Tool Steel & Die Steel manufacturer, with a market share of more than 15%.
