According to our (Global Info Research) latest study, the global Tuna Oil market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Cold-water wild varieties of fish like tuna contain high amounts of omega-3 fatty acids. Omega-3s contribute to typical brain and eye development. They fight inflammation and may help prevent heart disease and a decline in brain function. Because fish oil contains a lot of omega-3s, people who are at risk of these health conditions can benefit from taking it.

Health and Wellness Trends: Growing consumer awareness of the health benefits associated with omega-3 fatty acids, such as heart health, cognitive function, and anti-inflammatory properties, was driving the demand for tuna oil. Consumers were seeking products rich in omega-3s, including dietary supplements, functional foods, and beverages.

Increased Demand for Functional Foods: The demand for functional foods and supplements that provide specific health benefits beyond basic nutrition was on the rise. Tuna oil, being a rich source of omega-3s, was incorporated into various products to enhance their nutritional profile and appeal to health-conscious consumers.

Expansion of the Dietary Supplement Industry: The dietary supplement industry was experiencing growth as consumers sought natural ways to support their health. Tuna oil was used as an ingredient in omega-3 supplements, contributing to the expansion of this market segment.

Pet Nutrition Trends: The pet food industry was incorporating functional ingredients to enhance the health and well-being of pets. Tuna oil's omega-3 content made it an attractive addition to pet foods, as it was believed to promote healthy skin, coat, and joint health in pets.

Cosmetics and Personal Care Applications: The cosmetic and personal care industries were exploring the use of tuna oil in skincare and beauty products due to its potential moisturizing and skin-nourishing properties. This diversification of applications contributed to the demand for tuna oil.

Rise of Alternative Omega-3 Sources: The availability of alternative sources of omega-3 fatty acids, such as algae-derived oils, was a factor that influenced the tuna oil market. Consumers and manufacturers were considering these alternatives, especially in response to concerns about overfishing and sustainability.
