## Abstracts

According to our (Global Info Research) latest study, the global UKAS Temperature Calibration Services market size was valued at US\$ 900 million in 2025 and is forecast to a readjusted size of US\$ 1284 million by 2032 with a CAGR of 5.2% during review period.

To address the issues of insufficient credibility of temperature measurement equipment calibration results, incomplete traceability chains, and the inability to meet stringent international quality system requirements, UKAS temperature calibration services emerged. With the advancement of global trade and the integration of quality management standards, particularly since the widespread establishment of the ISO standard system in the latter half of the 20th century, authoritative accreditation services in the field of measurement have experienced significant development. Currently, UKAS temperature calibration services have developed into an authoritative calibration system rigorously reviewed and accredited by the United Kingdom Accreditation Service (UKAS), covering various high-level standard devices such as constant temperature baths, dry-block calibrators, precision temperature bridges, and blackbody radiation sources. It is widely used in fields with stringent temperature measurement requirements, such as pharmaceuticals, food, aerospace, medical equipment, industrial manufacturing, and research laboratories. It provides internationally recognized calibration certificates traceable to national and international standards, ensuring the accuracy and reliability of measurement data, supporting compliance, and guaranteeing the quality and safety of products and processes.
