Ultra-short-throw (UST) projectors are often marketed as TV replacements because they can deliver a massive image from a very short distance and have a footprint smaller than any TV.

Ultra Short Throw Laser TV, as an innovative technology in the field of home entertainment in recent years, has set a new trend in the television industry. Unlike traditional TVs, Ultra Short Throw Laser TV no longer requires large rear projections or LCD panels; instead, it employs high-brightness laser projection to display images. The standout feature of this technology is its incredibly short throw distance, typically only a few inches to a foot from the wall, to achieve a screen size of 100 inches or even larger. This compact design not only saves space but also eliminates light interference during viewing, making the home theater setup more streamlined and comfortable.
