Abstracts

Accounting software is a foundational technology for many companies, and as a business grows having a powerful, effective accounting solution becomes increasingly critical. Most accounting software packages offer the same basic features necessary for managing finances: accounts receivable, accounts payable, general ledger, billing and invoicing, purchase and sales orders, and reporting. Beyond basic functionality, the top accounting solutions offer additional features to give users more power, flexibility and customization. Oftentimes accounting solutions are closely integrated with other key software solutions. Most ERP solutions include an extensive accounting module, but buyers should also consider best-of-breed, standalone accounting software.
