Abstracts

'The automatic knife gate valve is a knife gate valve with an actuator installed. Mainly pneumatic actuators and electric actuators, in addition, some occasions with hydraulic actuators.

Knife gate valve is linear shut off valves that are light weight with compact construction. Valves are available as manual with hand-wheel, or can be automated with pneumatic cylinder actuator for remote operation. The arc shape of the gate of knife gate valve is signed to be particularly suitable for cutting off fluid containing fiber or suspended particles, so the knife gate valves are ideal for many applications in the process industries of pulp & paper, wastewater treatment, mining, sugar making and chemical processing.'
