Abstracts

This report studies the Car Dashcam market. A 'dash cam' is exactly what its name promises it to be: a camera that's mounted in or around your car's dashboard. The cams are easily attached using a suction cup mount, direct dash friction mounts (those sticky rubber pads) and even built right into a not-too-conspicuous replacement rear mirror for your ride. Powered by batteries, hardwired into vehicle's 12-volt system or via cigarette lighter, the dash cam faithfully records all it sees.
