Abstracts

Ceramic tiles are ceramic products manufactured from a mixture of clays and inorganic non-metallic materials, for all requirements in architecture, interior design and building construction. Glazed tile is the most common style in floor and wall tiles with shiny or matte finishes. For unglazed tiles, their color is the same on the face of the tile as it is on the back. Porcelain tile is a higher grade of ceramic tile, made from a finer type of clays and are fired at a higher temperature.
