Abstracts

This report studies the French Door Refrigerators market. French door refrigerators are named after the architectural structure of French doors: they are refrigerators with the same features of French doors. These machines also have a bottom freezer door with a separate handle. French door refrigerators are fairly new in terms of appliances since they didn't become widely available for sale until 2005. The main advantage of this type of refrigerator is that only one side of the fridge needs to be opened at one time.
