Lyocell, derived from cellulose, is known as a man-made fiber. It is popularly known by the brand name 'Tencel.' Lyocell, a type of rayon fiber, is manufactured in a closed-loop method through a solvent spinning technique, wherein the cellulose undergoes a limited chemical change. Lyocell fibers are widely used in the textile industry in a broad range of apparels and home textiles. These fibers are also used in the medical industry in the production of medical equipment and surgical products.
