## Abstracts

'The prostate is a walnut-sized gland located behind the base of a man's penis, in front of the rectum, and below the bladder. Cancer begins when healthy cells in the prostate change and grow out of control, forming a tumor. A tumor can be cancerous or benign. A cancerous tumor is malignant, meaning it can grow and spread to other parts of the body. A benign tumor means the tumor can grow but will not spread.

Prostate Cancer Diagnostics refers to using PSA, rectal exam, biopsy and others to diagnostic whether patients with breast cancer.'
