Abstracts

Smart home system is an intelligent web-connected electronic system which is designed to operate stand-alone or in a network with other devices. With recent developments across different areas of connectivity of appliances and devices, these systems enable users to monitor and control them even when they are on the move. This includes mobile connectivity features, an integral component of smart homes provided by device manufacturers; and compatible communication protocol and technology based products offered by Internet Service Providers. New technology is enabling the creation of smart homes, integrating devices to make the home a better place to be in terms of safety, comfort, productivity and well-being.
