## Abstracts

According to our (Global Info Research) latest study, the global Universal Power Over Ethernet (UPOE) market size was valued at US\$ 902 million in 2024 and is forecast to a readjusted size of USD 1160 million by 2031 with a CAGR of 3.6% during review period.

Universal Power over Ethernet (UPOE) is an advanced networking technology that allows Ethernet cables to deliver both data and power to devices over a single connection. UPOE provides up to 60 watts of power per port, significantly higher than the standard Power over Ethernet (PoE), which offers 15.4 watts. This enhanced power capacity enables UPOE to support a wider range of devices, such as IP cameras, wireless access points, and VoIP phones, without the need for separate power sources. UPOE simplifies installation, reduces cabling complexity, and is commonly used in enterprise networking environments for efficient power and data transmission.
