Abstracts

According to our (Global Info Research) latest study, the global Unmanned Sanitation Vehicles market size was valued at US\$ 276 million in 2025 and is forecast to a readjusted size of US\$ 726 million by 2032 with a CAGR of 14.7% during review period.

In 2025, global Unmanned Sanitation Vehicles production reached approximately 3.4k units, with an average global market price of around US\$ 80k per unit.

An unmanned sanitation vehicle is an autonomous specialized vehicle designed for street and public-area cleaning. It integrates cleaning modules (sweeping/vacuuming, water spraying for dust suppression, and waste collection) with autonomy stacks based on LiDAR/cameras/radar, positioning, and mapping/SLAM to perform low-speed self-driving, path planning, obstacle avoidance, and task execution. It is mainly deployed on sidewalks, campuses, service roads, bike lanes, and controlled or semi-controlled environments, improving safety and consistency while enabling remote dispatching and O&M via smart sanitation platforms.

Upstream includes chassis/structures (steel/aluminum, frames, sheet metal/coating), powertrain (motors, inverters, reducers, steering/braking), energy systems (Li-ion packs, BMS, charging & distribution), autonomy/electrical parts (LiDAR, cameras, radars, GNSS/IMU, compute/controllers, harness/connectors), and cleaning modules (main/side brushes, blower & vacuum, spraying/pumps/valves, bins and lifting mechanisms). Midstream OEMs integrate vehicle + autonomy software (localization, perception, planning, control), safety redundancies (E-stop, teleoperation takeover, functional safety), and connect to smart sanitation platforms for dispatch and data loops. Downstream customers are municipalities, sanitation operators, and property/industrial

park owners. Representative upstream ecosystems include Hesai/RoboSense (LiDAR), Sony (image sensors), NVIDIA/Qualcomm (compute), and CATL/BYD (batteries); downstream users include Veolia, SUEZ, major sanitation operators, and projects such as WeRide-enabled deployments in Singapore.

The annual production capacity of a single-line Unmanned Sanitation Vehicles is approximately 100 units, with a gross profit margin of approximately 20%-45%.
