Urology video endoscopes are advanced medical instruments used to visualize the interior of the urinary tract for diagnostic and therapeutic purposes. These endoscopes are equipped with a high-resolution video camera that transmits real-time images to a monitor, allowing urologists to examine the bladder, ureters, kidneys, and prostate with greater precision. Video endoscopy has revolutionized urology by enabling minimally invasive procedures such as cystoscopy, ureteroscopy, and prostate biopsy, which reduce recovery times, minimize patient discomfort, and lower the risk of complications. The technology continues to evolve with features like enhanced image quality, 3D imaging, and improved maneuverability, supporting more accurate diagnoses and treatment plans.
