## Abstracts

According to our (Global Info Research) latest study, the global Value Added Services in Logistics market size was valued at US\$ 2393 million in 2025 and is forecast to a readjusted size of US\$ 4165 million by 2032 with a CAGR of 8.2% during review period.

Value Added Services in Logistics refer to a range of extended, customized service solutions provided by logistics enterprises beyond basic transportation, warehousing, and distribution functions, aiming to optimize the entire supply chain efficiency and meet clients' diversified business needs. These services cover product processing (e.g., packaging, labeling, assembly, customization), supply chain management (e.g., inventory planning, demand forecasting, order fulfillment), information technology support (e.g., real-time cargo tracking, data analytics, digital platform services), and specialized supporting services (e.g., customs clearance, insurance, reverse logistics, after-sales maintenance). By integrating resources across the supply chain and leveraging professional capabilities, these value-added services help clients reduce operational costs, shorten lead times, enhance customer satisfaction, and gain competitive advantages, transforming logistics from a simple 'transportation and storage tool' into a core enabler of business development.

Market demand for Value Added Services in Logistics is driven by the globalization of trade, the diversification of consumer demand, the rise of e-commerce and cross-border business, and enterprises' increasing focus on core business and supply chain optimization. Business opportunities lie in developing industry-specific customized solutions (e.g., cold chain value-added services for food and pharmaceuticals, precision assembly for automotive parts, cross-border e-commerce one-stop customs clearance services), leveraging digital technologies such as IoT, AI, and blockchain to upgrade

intelligent management and data-driven decision-making capabilities, and expanding integrated service portfolios (e.g., combining value-added services with supply chain financing, green logistics) to enhance client stickiness. Additionally, catering to the trend of sustainability through low-carbon packaging, carbon footprint tracking, and circular logistics services, as well as exploring emerging markets with booming regional trade, further opens up growth space for logistics enterprises with strong resource integration, technological innovation, and flexible response capabilities.

This report is a detailed and comprehensive analysis for global Value Added Services in Logistics market. Both quantitative and qualitative analyses are presented by company, by region & country, by Service Function Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

### **Key Features:**

Global Value Added Services in Logistics market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Value Added Services in Logistics market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Value Added Services in Logistics market size and forecasts, by Service Function Type and by Application, in consumption value (\$ Million), 2021-2032

Global Value Added Services in Logistics market shares of main players, in revenue (\$ Million), 2021-2026

### **The Primary Objectives in This Report Are:**

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Value Added Services in Logistics

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Value Added Services in Logistics market based on the following parameters - company overview, revenue, gross margin, product

portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Rhenus, The Green Group, Crown LSP, Bleckmann Nederland, Americold, CEVA Logistics, Delamode, Advanced Supply Chain Group, Yusen Logistics, Crane Worldwide Logistics, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

## **Market segmentation**

Value Added Services in Logistics market is split by Service Function Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Service Function Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
