Abstracts

According to our (Global Info Research) latest study, the global Vegan Digestive Enzyme Supplement market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Vegan digestive enzyme supplement is a dietary supplement specifically formulated to support digestion in individuals following a vegan or plant-based diet. These supplements contain a blend of enzymes derived from plant-based sources that aid in the breakdown and digestion of different macronutrients, such as proteins, carbohydrates, and fats.

According to the Global Use of Medicines 2023 released by IQVIA Institute, the global drug expenditure in 2022 was about US\$1.48 trillion (excluding COVID vaccine and treatment-related expenses), and it is predicted to grow at a rate of 3%-6% in the next few years. In terms of drug expenditure, this number in China was about 166 billion dollars in 2022. It is expected that the expenditure on medicines will increase in the next few years. From the perspective of demand, the trend of population aging, the increase of residents' wealth and the improvement of health awareness will drive the demand for medicines.

Global Use of Medicines 2023 shows that the U.S. market spent about US\$ 62.9 billion on medicines in 2022 on a net ex-factory basis. Overall growth slows as the Inflation Reduction Act (IRA) spends US\$64 billion to reduce prescription drug prices, and the adoption of new treatments is expected to increase over the next few years. Besides, ex-factory discounts and rebates in drug distribution, the impact of patent expiration, and generic or biosimilar competition will also affect the U.S. pharmaceutical market.
