A Vet Ultrasound System is a medical imaging device specifically designed for veterinary use, allowing veterinarians to visualize the internal structures of animals non-invasively. The system employs high-frequency sound waves (ultrasound) to create real-time images of organs, tissues, and blood flow within an animal's body. These images help veterinarians diagnose and monitor various medical conditions in a wide range of animals, from small pets like cats and dogs to large livestock such as horses and cattle.
