Abstracts

According to our (Global Info Research) latest study, the global Vinylene Carbonate for Consumer Batteries market size was valued at US\$ 196 million in 2024 and is forecast to a readjusted size of USD 411 million by 2031 with a CAGR of 10.3% during review period.

Vinylene carbonate (VC), with the chemical formula $C_3H_2O_3$, is a colorless and transparent liquid. As a new organic film-forming additive and overcharge protection additive for lithium-ion batteries, it has good high and low temperature performance and anti-flatulence function, which can increase the capacity and cycle life of the battery.

Consumer electrolytes are the primary use for additives. Since its commercialization, lithium-ion batteries have been widely used in 3C products such as notebook computers, mobile phones, digital cameras, tablet computers, and portable game consoles due to their excellent performance, which is greatly affected by the growth in demand.

This report is a detailed and comprehensive analysis for global Vinylene Carbonate for Consumer Batteries market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Vinylene Carbonate for Consumer Batteries market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2020-2031

Global Vinylene Carbonate for Consumer Batteries market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2020-2031

Global Vinylene Carbonate for Consumer Batteries market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2020-2031

Global Vinylene Carbonate for Consumer Batteries market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/Ton), 2020-2025

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Vinylene Carbonate for Consumer Batteries

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Vinylene Carbonate for Consumer Batteries market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments.

Key companies covered as a part of this study include Jiangsu HSC New Energy Materials, Shenzhen Capchem Technology, Rongcheng Qing Mu High-Tech Materials, Guangzhou Tinci, Suzhou Huayi New Energy Technology, Fujian Chuangxin, Yuji Tech, Yongtai Technology, Fujian Broahony New Energy Technology, Shandong Yonghao New Material Technology, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Vinylene Carbonate for Consumer Batteries market is split by Type and by Application. For the period 2020-2031, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume

and value. This analysis can help you expand your business by targeting qualified niche markets.
