A volumetric flask is a type of laboratory glassware used to measure and maintain a precise volume of liquid, offering greater accuracy compared to a graduated cylinder. Unlike graduated cylinders, volumetric flasks are designed for high precision in volume measurement.

Typically made of glass, some volumetric flasks are also constructed from plastic or resin. The flask features a flat, spherical bottom extending into an elongated cylindrical neck, which can be sealed with a stopper. Volumetric flasks are available in transparent colorless types or a brownish tint known as a tea flask.
