Abstracts

According to our (Global Info Research) latest study, the global Wall-hung Bidet market size was valued at US\$ 1877 million in 2024 and is forecast to a readjusted size of USD 2748 million by 2031 with a CAGR of 5.7% during review period.

A floor-standing bidet is a plumbing fixture used for personal hygiene and cleansing after using the toilet. Unlike traditional bidets that are separate fixtures typically installed next to the toilet, a floor-standing bidet is a standalone unit that rests on the floor. It is designed to be used in bathrooms where there may not be sufficient space or plumbing infrastructure to install a traditional bidet.

Increased Adoption in Residential Settings: Wall-hung bidets were gaining popularity in residential bathrooms, especially in urban areas where space is limited. The modern and space-saving design of these bidets makes them attractive for homeowners.

Sustainability and Water Efficiency: Consumers and regulators are increasingly concerned about water conservation. Manufacturers have been developing wall-hung bidets with water-saving features, such as adjustable water pressure and temperature controls, to reduce water consumption during use.

Hygienic and Health-Conscious Design: Manufacturers have been focusing on incorporating hygienic features into wall-hung bidets, including self-cleaning nozzles, antimicrobial surfaces, and touchless controls. These features are particularly important for health-conscious consumers.

Smart Bidet Features: Some wall-hung bidet models are equipped with smart features, including remote controls, smartphone apps for customization, and user presets for

water temperature, pressure, and nozzle position. These smart bidets offer a high level of personalization.

Heated Seats and Air Drying: Many wall-hung bidets come with heated seats and air-drying functions, providing enhanced comfort and reducing the need for toilet paper.
