Functions and other functions that belong to air conditioners have also been used by many electric fan manufacturers to make a fuss, and on this basis, more practical functions such as lighting and mosquito repellent have been added. These products with eclectic appearance and diverse functions have become a highlight in the electric fan market this year, and this differentiated selling point also indicates the future development trend and direction of the entire electric fan industry. As a small household appliance, electric fans have a very long history of use. Until now, electric fans have entered thousands of households due to their cheapness and energy-saving features, and have become the main means for every family to control indoor air circulation and cool down. Judging from past data, the demand for electric fans has not decreased with the increase in the share of air conditioners. In the long run, the electric fan market will usher in new development. How to tap new user needs while improving functionality? Demand is a topic that electric fan brands need to discuss at present.
