A wall-mounted range hood is a ventilation system that is attached to the wall directly above your cooking area. If you currently have a cabinet in this space above the stove, it can be removed to make room for this variety of vent hood.

Wall-mounted Range Hoods can be positioned right on the wall above the hob. Their high extraction rates make them impressively effective at eliminating smoke, odours, and steam. The innovative climateControl Sensor measures steam intensity and grease content while you cook and automatically adjusts the extraction rate.
