## Abstracts

According to our (Global Info Research) latest study, the global Wear-resistant Ceramic Particle Adhesive market size was valued at US\$ 282 million in 2025 and is forecast to a readjusted size of US\$ 499 million by 2032 with a CAGR of 8.5% during review period.

In 2025, global sales of wear-resistant ceramic particle adhesive reached 7,200 tons, with an average selling price of US\$38,000 per ton. Wear-resistant ceramic particle adhesive is a composite adhesive with high-hardness ceramic particles as fillers and polymers as the matrix. It has high wear resistance, corrosion resistance, high temperature resistance and excellent bonding performance, and is widely used in mechanical seals, pump and valve linings, mining equipment liners, pipeline wear-resistant layers and industrial tool surface protection. Its upstream raw materials include alumina, silicon carbide, silicon nitride ceramic particles, epoxy resin or polyurethane matrix, curing agent and additives. On average, each ton of wear-resistant adhesive consumes approximately 650 kg of ceramic particles, 250 kg of matrix material, and 50 kg of additives. Downstream, it mainly supplies mining equipment manufacturers, metallurgical, building materials and pump and valve companies, with mining and metallurgy accounting for 50%, pumps, valves and pipelines accounting for 30%, and other industrial equipment accounting for 20%. The global total capacity is approximately 8,000 tons/year, and the industry gross profit margin is approximately 28%-38%. In terms of downstream consumption, new equipment production accounts for 60%, and maintenance and replacement account for 40%. The future development lies in upgrading to higher hardness ceramic particles, extreme temperature resistance, fast curing and functional composite adhesives. With the increasing demand for lightweight industrial equipment, high wear-resistant materials and the trend of domestic

high-performance material substitution, the wear-resistant ceramic particle adhesive market will continue to expand and has high added value development potential.
