A welding torch is a handheld tool used in various welding processes to generate and control the flame necessary to melt and join metal workpieces together. It typically consists of a handle, a trigger or valve for controlling the flow of fuel gas (such as acetylene or propane) and oxygen, and a nozzle or tip where the gases mix and ignite to produce the welding flame. 'Wear parts' in the context of a welding torch refer to the components that are subject to wear and tear during the welding process and may need periodic replacement to maintain the torch's performance and efficiency.

Global key players of Welding Torch and Wear Parts include Lincoln Electric, Illinois Tool Works, Fronius International, Abicor Binzel, Panasonic, etc. The top five players hold a share over 40%.
