Wide Dynamic Range (WDR) IP cameras are advanced surveillance devices designed to deliver clear and detailed video in environments with challenging lighting conditions. Utilizing WDR technology, these cameras can capture high-quality images by balancing areas of intense light and shadow within the same frame, ensuring that both bright and dark areas are visible. This makes them ideal for locations with strong backlighting, such as entrances, windows, or outdoor settings. WDR IP cameras are commonly used in security systems for residential, commercial, and industrial applications, providing reliable monitoring with features like high resolution, motion detection, and remote access via network connectivity.
