Abstracts

According to our (Global Info Research) latest study, the global Wiring Boxes market size was valued at US\$ 4444 million in 2024 and is forecast to a readjusted size of USD 7341 million by 2031 with a CAGR of 7.5% during review period.

Essentially, a wiring box houses wire connections in order to split off power from a single source to multiple outlets. For instance, a wiring box might contain one wire power source that is connected through multiple wires to power several different lights.

Semiconductor manufacturing equipment is a medium tool for achieving semiconductor manufacturing processes, playing an important role in all aspects. According to SEMI, worldwide sales of semiconductor manufacturing equipment increased 5% from \$102.6 billion in 2021 to an all-time record of \$107.6 billion in 2022.

In recent years, the localization process of China's semiconductor industry has further accelerated, and the performance of semiconductor equipment is more flexible than the overall industry. The localization of semiconductor equipment is ushering in a golden wave, and domestic semiconductor equipment is facing more opportunities for verification and trial use, technical cooperation, and import substitution. For the third consecutive year, China remained the largest semiconductor equipment market in 2022 despite a 5% slowdown in the pace of investments in the region year over year, accounting for \$28.3 billion in billings.
