Wood Pellet Cat Litter Pros and Cons & Top 6 Options

Updated on May 27, 2021 By MrBossCat Team

Wood pellet cat litter

Table of Contents [show]

Wood pellet litter is a type of natural pellet litter that is commonly produced from pine or cedarwood.

Compared to ordinary clay-based litter, it has larger granules that are composed of compressed wood fibers that disintegrate into sawdust when wet.

I switched to wood pellet litter a few years ago and haven't looked back since! It is a viable alternative to conventional litter because it is an eco-friendly option made from natural and recycled materials. It also has the benefit of being non-tracking and dust-free! This means less time and effort is spent cleaning up after our gorgeous felines and more time spent bonding.

With so many perks, there is no reason why you should refrain from switching to this kind of natural litter. However, some owners are turned off by the fact that wood pellet litter doesn't clump. Yet, with the right litter box and cleaning know-how, this doesn't have to be an issue.

To help you decide whether switching to wood pellet cat litter is the right move for you, I've pulled together all the advantages and disadvantages. I've also written about how it works, how to use it effectively, and a selection of the best wood pellet litter options currently on the market.

How Does Wood Pellet Cat Litter Work?

Before we get into the pros, cons, and best products available, there is an important question that needs answering: How does wood pellet cat litter work? Well, while using wood pellet litter is a bit different from traditional clay litter as it typically doesn't clump, it is still just as easy and convenient.

Wood pellet cat litter is a type of natural pellet litter. Pellets are granules that are made from a variety of absorbent biodegradable materials, constituting an effective option as cat litter. Unlike the traditional fine-grain clumping clay litter, pellet litters have larger and coarser pieces.

According to IVH, the German pet products industry association, the number of pets in Germany reached 33.4 million in 2022, with a total turnover of nearly €6.5 billion. The 2023 China Pet Industry Trend Insight White Paper released by JD shows that the market size of the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 631%.
