According to our (Global Info Research) latest study, the global Wooden Railway Ties market size was valued at US\$ 1510 million in 2024 and is forecast to a readjusted size of USD 1670 million by 2031 with a CAGR of 1.5% during review period.

The wooden tie is made from a variety of softwood and hardwoods timbers, oak, jarrah and karri being popular hardwoods, hardwood railway ties are generally much more durable and naturally longer lasting. The wooden tie has the characteristics such as elasticity, light weight, simple in making, good insulation properties, fasteners simply connect to the wooden ties, and it is easy to lay, maintenance and transport. What's more, there is a greater coefficient of friction between the wooden ties and the ballast. The drawback of railroad ties is that the useful life is short, wood consumption is large. To effectively extend the service life, ties generally must be used after filling the anti-corrosion.

Global key players of Wooden Railway Ties include Stella-Jones, Koppers, CRM, etc. The top three players hold a share about 86%. United States is the world's largest market for Wooden Railway Ties and holds a share about 80%, followed by China and Europe, with share about 5% and 3%, separately. In terms of product type, Hardwood Sleepers is the largest segment, accounting for a share about 92%. In terms of application, Railway is the largest field with a share about 89 percent.
