Abstracts

According to our (Global Info Research) latest study, the global YAG and Nd:YAG Crystal market size was valued at US\$ 840 million in 2024 and is forecast to a readjusted size of USD 1230 million by 2031 with a CAGR of 5.7% during review period.

The YAG (Yttrium Aluminum Garnet) and Nd:YAG (Neodymium doped Yttrium Aluminum Garnet) crystals. Doped YAG crystals, specially neodymium doped YAG or Nd:YAG, finds huge applications in solid state lasers. Nd:YAG crystal has been the primary choice of laser crystal in most laser applications. High homogeneity of these crystals and ability to withstand decay, due to higher damage threshold, are some properties which have led it to become the crystal of choice in high energy pulsed lasers. The high energy pulsed lasers generally generates energy levels above 1 joule/pulse. Thus, the higher damage threshold ensures longer application time of these crystals. Additionally, Nd:YAG crystal based lasers are increasingly being utilized for such high precision procedures.

According to our research, the global Electronic Components market is approximately USD 466.61 billion in 2022. The Asia-Pacific region is a major market for electronic components. The downstream application fields of the electronic components industry are extensive, including communication equipment, consumer electronics, automotive electronics, smart home, industrial control, military security and other fields. Unlike the strong industry demand in 2021, downstream industry demand in 2022 showed a differentiated trend. The demand for traditional electronic applications represented by mobile phones and computers has turned weak, which has a greater impact on the demand of the entire industry; the demand for communication equipment and data centers has maintained growth but slowed down, and the industrial and Internet of

Things driven by digital transformation and the development of artificial intelligence technology. The steady growth of application demand and the accelerated development of the new energy vehicle market can offset the decline in some consumer markets and provide support for long-term demand growth.
