Abstracts

20s Proteasome Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

SUMMARY

20s Proteasome - 20S proteasome is the catalytic core of the 26S proteasome, the central protease of the ubiquitin pathway of protein degradation. It is commonly associated with regulatory complexes, which include the 19S Proteasome, the PA28 alpha/beta complex, or the PA28 gamma complex. The 20S Proteasome is composed of 28 subunits arranged into four stacked rings. Unlike the 26S proteasome, which degrades proteins in an ATP-dependent manner, the 20S proteasome is ATP-independent and only degrades entirely unfolded polypeptides.

20s Proteasome pipeline Target constitutes close to 10 molecules. Out of which approximately 6 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Phase III, Phase II and Preclinical stages are 1, 2 and 3 respectively. Similarly, the universities portfolio in Preclinical and Discovery stages comprises 1 and 3 molecules, respectively. Report covers products from therapy areas Oncology, Immunology, Infectious Disease and Metabolic Disorders which include indications Multiple Myeloma (Kahler Disease), Refractory Multiple Myeloma, Relapsed Multiple Myeloma, Acute Lymphocytic Leukemia (ALL, Acute Lymphoblastic Leukemia), Amyloidosis, Colon Cancer, Cutaneous T-Cell Lymphoma, Diffuse Large B-Cell Lymphoma, Glioblastoma Multiforme (GBM), Gliosarcoma, Kidney Transplant Rejection, Leukemia, Lung Transplant Rejection, Malignant Glioma, Metastatic Renal Cell Carcinoma,

Neuroendocrine Cancer, Pancreatic Cancer, Pediatric Diffuse Intrinsic Pontine Glioma, Peripheral T-Cell Lymphomas (PTCL), Plasma Cell Neoplasm, Small-Cell Lung Cancer, Tuberculosis, Unspecified Cancer and Waldenstrom Macroglobulinemia (Lymphoplasmacytic Lymphoma).

The latest report 20s Proteasome - Drugs In Development, 2022, outlays comprehensive information on the 20s Proteasome targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in 20s Proteasome targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for 20s Proteasome

The report reviews 20s Proteasome targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in 20s Proteasome targeted therapeutics and enlists all their major and minor projects

The report assesses 20s Proteasome targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to 20s Proteasome targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for 20s Proteasome Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding 20s Proteasome development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

20s Proteasome - Overview

20s Proteasome - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

20s Proteasome - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

20s Proteasome - Companies Involved in Therapeutics Development

Amgen Inc

Bristol-Myers Squibb Co

Centrax International Inc

HuniLife Biotechnology Inc

Featured News & Press Releases

Dec 06, 2021: Amgen announces new data on Nplate to be presented at ASH 2021

Dec 06, 2021: Amgen announces new data on KYPROLIS to be presented at ASH 2021

Jul 09, 2021: BeiGene announces the approval in China of KYPROLIS (Carfilzomib) for injection for adult patients with relapsed or refractory multiple myeloma

Mar 22, 2021: Triple therapy recommended by NICE for patients with multiple myeloma

Nov 30, 2020: Amgen announces new data on KYPROLIS At ASH 2020

Nov 12, 2020: CHMP adopts a positive opinion recommending a change to the terms of the marketing authorisation for Kyprolis

Aug 20, 2020: FDA approves new KYPROLIS (carfilzomib) combination regimen with DARZALEX (daratumumab) and Dexamethasone in both once- and twice-weekly dosing regimens

May 14, 2020: Oncolytics Biotech announces publication of abstract on Kyprolis at the

2020 American Society of Clinical Oncology Virtual Annual Meeting

May 13, 2020: Amgen presents update on KYPROLIS at ASCO 2020

May 05, 2020: KYPROLIS (carfilzomib) patents upheld against generic manufacturer

Dec 11, 2019: Amgen reports positive data in multiple myeloma study

Dec 02, 2019: Amgen announces data to be presented on KYPROLIS (carfilzomib) at ASH 2019

Sep 13, 2019: Amgen announces phase 3 CANDOR study combining KYPROLIS (carfilzomib) and DARZALEX (daratumumab) meets primary endpoint of progression-free survival

Sep 12, 2019: Amgen highlights new data From KYPROLIS (carfilzomib) and Oncology Pipeline At IMW 2019

Aug 19, 2019: Carfilzomib (Kyprolis): reminder of risk of potentially fatal cardiac events
