Abstracts

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) - Pipeline Review, H2 2018

SUMMARY

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) - Binding immunoglobulin protein (BiP) or 78 kDa glucose-regulated protein (GRP-78) is a protein encoded by HSPA5 gene. It plays a role in facilitating the assembly of multimeric protein complexes inside the endoplasmic reticulum. It is involved in the correct folding of proteins and degradation of misfolded proteins via its interaction with DNAJC10.

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) pipeline Target constitutes close to 5 molecules. Out of which approximately 4 molecules are developed by companies and remaining by the universities/institutes.

The molecules developed by companies in Phase II, Phase I, Preclinical and Discovery stages are 1, 1, 1 and 1 respectively. Similarly, the universities portfolio in Preclinical

stages comprises 1 molecules, respectively. Report covers products from therapy areas Oncology and Immunology which include indications Lung Cancer, Pancreatic Cancer, Breast Cancer, Cervical Cancer, Colon Cancer, Esophageal Cancer, Gastric Cancer, Glioma, Melanoma, Pancreatic Ductal Adenocarcinoma, Rheumatoid Arthritis and Solid Tumor.

The latest report 78 kda Glucose Regulated Protein - Pipeline Review, H2 2018, outlays comprehensive information on the 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5)

The report reviews 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development

ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) targeted therapeutics and enlists all their major and minor projects

The report assesses 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding 78 kda Glucose Regulated Protein (Endoplasmic Reticulum Luminal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) - Overview

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

78 kda Glucose Regulated Protein (Endoplasmic Reticulum Lumenal Ca(2+) Binding Protein Grp78 or Heat Shock 70 kDa Protein 5 or Immunoglobulin Heavy Chain Binding Protein or HSPA5) - Companies Involved in Therapeutics Development

Intezyne Inc

Nuevolution AB
