Abstracts

Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) - Pipeline Review, H2 2018

SUMMARY

Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) - Alpha-galactosidase is a glycoside hydrolase enzyme encoded by the GLA gene. This enzyme is a homodimeric glycoprotein that hydrolyses the terminal alpha-galactosyl moieties from glycolipids and glycoproteins. It predominantly hydrolyzes ceramide trihexoside, and it can catalyze the hydrolysis of melibiose into galactose and glucose. Mutations in this gene affect the synthesis and stability of this enzyme which causes Fabry's disease.

Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) pipeline Target constitutes close to 12 molecules. Out of which approximately 11 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Pre-Registration, Phase III, Phase II and Preclinical stages are 1, 1, 2 and 7 respectively. Similarly, the universities portfolio in Unknown stages comprises 1 molecules, respectively. Report covers products from therapy areas Genetic Disorders which include indications Fabry Disease.

The latest report Alpha Galactosidase A - Pipeline Review, H2 2018, outlays comprehensive information on the Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type. It also reviews key players involved in Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) targeted therapeutics development with respective active and dormant or discontinued projects.

The report is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22)

The report reviews Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Alpha Galactosidase A (Alpha D-

Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) targeted therapeutics and enlists all their major and minor projects

The report assesses Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Alpha

Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Alpha Galactosidase A (Alpha D-Galactosidase A or Alpha D Galactoside Galactohydrolase or Melibiase or Agalsidase or GLA or EC 3.2.1.22) - Overview
