## **Abstracts**

Aplastic Anemia Drugs in Development by Stages, Target, MoA, RoA, Molecule Type and Key Players, 2022 Update

### **SUMMARY**

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Aplastic Anemia - Drugs In Development, 2022, provides an overview of the Aplastic Anemia (Hematological Disorders) pipeline landscape.

Aplastic anemia is a syndrome of bone marrow failure characterized by peripheral pancytopenia and marrow hypoplasia. Symptoms include fatigue, pale skin, rapid or irregular heart rate, shortness of breath with exertion, nosebleeds and bleeding gums, prolonged bleeding from cuts, skin rash, dizziness and headache. Risk factors include exposure to toxic chemicals, treatment with high-dose radiation or chemotherapy for cancer, certain blood diseases, autoimmune disorders and serious infections. Treatment includes immunosuppressants and stem cell transplant.

### **REPORT HIGHLIGHTS**

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Aplastic Anemia - Drugs In Development, 2022, provides comprehensive information on the therapeutics under development for Aplastic Anemia (Hematological Disorders), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and

development history and latest news and press releases.

The Aplastic Anemia (Hematological Disorders) pipeline guide also reviews of key players involved in therapeutic development for Aplastic Anemia and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies/Universities/Institutes, the molecules developed by Companies in Pre-Registration, Filing rejected/Withdrawn, Phase III, Phase II, Phase I, Preclinical and Discovery stages are 2, 1, 1, 6, 2, 5 and 1 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 2 molecules, respectively.

Aplastic Anemia (Hematological Disorders) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

**Note:** Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

## SCOPE

The pipeline guide provides a snapshot of the global therapeutic landscape of Aplastic Anemia (Hematological Disorders).

The pipeline guide reviews pipeline therapeutics for Aplastic Anemia (Hematological Disorders) by companies and universities/research institutes based on information derived from company and industry-specific sources.

The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.

The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

The pipeline guide reviews key companies involved in Aplastic Anemia (Hematological Disorders) therapeutics and enlists all their major and minor projects.

The pipeline guide evaluates Aplastic Anemia (Hematological Disorders) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

The pipeline guide reviews latest news related to pipeline therapeutics for Aplastic Anemia (Hematological Disorders)

## **REASONS TO BUY**

Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

Find and recognize significant and varied types of therapeutics under development for Aplastic Anemia (Hematological Disorders).

Classify potential new clients or partners in the target demographic.

Develop tactical initiatives by understanding the focus areas of leading companies.

Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.

Formulate corrective measures for pipeline projects by understanding Aplastic Anemia (Hematological Disorders) pipeline depth and focus of Indication therapeutics.

Develop and design in-licensing and out-licensing strategies by identifying

prospective partners with the most attractive projects to enhance and expand business potential and scope.

Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases

May 12, 2021: Regen Biopharma announces consulting agreement with Biotech Research Group

Jan 11, 2021: Gamida Cell to present full data from phase 3 Study of omidubicel at TCT, the Combined Transplantation and Cellular Therapy Meetings of ASTCT and CIBMTR

Dec 14, 2020: Gamida Cell provides regulatory update on Biologics License Application for Omidubicel

Dec 09, 2020: Gamida Cell provides pipeline update, including detailed results of pivotal phase 3 clinical study of omidubicel, and prepares to start BLA submission by end of 2020

Nov 04, 2020: Gamida cell announces data on omidubicel to be presented at 62nd ASH Annual Virtual Meeting

Apr 21, 2020: Hemogenyx Pharmaceuticals announces approval and issuance of European Hu-PHEC Patent

Feb 11, 2020: Hemogenyx Pharmaceuticals: Approval and issuance of U.S. Hu-PHEC Patent

Oct 17, 2019: The CHMP adopted a negative opinion recommending the refusal of a

marketing authorisation for Revolade (eltrombopag)

Aug 01, 2019: Health ministry to reimburse Novartis' Revolade treating severe aplastic anemia

Jun 28, 2019: Refusal of a change to the marketing authorisation for Revolade (eltrombopag)

Jun 25, 2019: Novartis has requested a re-examination of EMA's opinion on Revolade

Jun 18, 2019: Kyowa Hakko Kirin receives the partial change approval of Romiplate for Aplastic Anemia in Japan

May 11, 2019: Novartis issues voluntary nationwide recall of Promacta 12.5 mg for oral suspension due to potential peanut contamination

Feb 21, 2019: Gamida cell presents initial data from phase 1/2 study of NiCord in severe aplastic anemia at 2019 TCT Annual Meeting

Feb 14, 2019: Gamida Cell to host conference call and webcast to review data from NiCord program being presented at 2019 TCT Annual Meeting
