Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Pipeline Review, H2 2018

SUMMARY

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) pipeline Target constitutes close to 21 molecules. Out of which approximately 16 molecules are developed by companies and remaining by the universities/institutes. The latest report Baculoviral IAP Repeat Containing Protein 5 - Pipeline Review, H2 2018, outlays comprehensive information on the Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Baculoviral inhibitor of apoptosis repeat-containing 5 or BIRC5 also known as Survivin is a protein encoded by the BIRC5 gene. It has dual roles in promoting cell proliferation and preventing apoptosis. It acts as an important regulator of the localization of this complex directs CPC movement to different locations from the inner centromere during prometaphase to midbody during cytokinesis and participates in the organization of the center spindle by associating with polymerized microtubules.

The complex with RAN plays a role in mitotic spindle formation by serving as a physical scaffold to help deliver the RAN effector molecule TPX2 to microtubules. It counteracts

a default induction of apoptosis in G2/M phase. It plays a role in neoplasia. The molecules developed by companies in Phase II, Preclinical and Discovery stages are 4, 10 and 2 respectively. Similarly, the universities portfolio in Phase II and Preclinical stages comprises 2 and 3 molecules, respectively. Report covers products from therapy areas Oncology and Immunology which include indications Pancreatic Cancer, Prostate Cancer, Bladder Cancer, Melanoma, Autoimmune Disorders, Bone Metastasis, Glioblastoma Multiforme (GBM), Metastatic Hormone Refractory (Castration Resistant, Androgen-Independent) Prostate Cancer, Ovarian Cancer, Solid Tumor, Colon Carcinoma, Colorectal Cancer, Diffuse Large B-Cell Lymphoma, Fallopian Tube Cancer, Head And Neck Cancer, Kidney Cancer (Renal Cell Cancer), Lymphoma, Malignant Mesothelioma, Metastatic Lung Cancer, Multiple Myeloma (Kahler Disease), Non Muscle Invasive Bladder Cancer (NMIBC) (Superficial Bladder Cancer), Non-Small Cell Lung Cancer, Peritoneal Cancer and Recurrent Glioblastoma Multiforme (GBM).

Furthermore, this report also reviews key players involved in Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5)

The report reviews Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) targeted therapeutics and enlists all their major and minor projects

The report assesses Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading companies

Plan mergers and acquisitions effectively by identifying key players and it's

most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Overview

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Products under Development by Universities/Institutes

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Companies Involved in Therapeutics Development

Biomics Biotechnologies Co Ltd

Bioneer Corp

Boehringer Ingelheim GmbH

IMV Inc

MimiVax LLC

Optimum Therapeutics LLC

Oxford Vacmedix UK Ltd

Polyplus-Transfection SA

Stemline Therapeutics Inc

Vaxeal Holding SA

Baculoviral IAP Repeat Containing Protein 5 (Apoptosis Inhibitor 4 or Apoptosis Inhibitor Survivin or BIRC5) - Drug Profiles

Antibody to Target Survivin for Oncology - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

Antisense RNAi Oligonucleotide to Inhibit Survivin and Bcl-2 for Bladder Cancer - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

Antisense RNAi Oligonucleotide to Inhibit Survivin and Cyclin B1 for Oncology - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

Antisense RNAi Oligonucleotide to Inhibit Survivin for Solid Tumors - Drug Profile

Product Description

Mechanism Of Action

R&D Progress

Antisense RNAi Oligonucleotides to Inhibit Survivin for Pancreatic Cancer and Bladder Cancer - Drug Profile
